HARYANA'S ONLY JAPAN INDUSTRIAL TOWNSHIP

A MEMORABLE YEAR FOR MET CITY

QUARTERLY NEWSLETTER - V O L . 6

The Conversation

Dear Readers,

Year'23 has been remarkable for MET City in terms of growth and achievements. The recognition of Reliance MET City as one of India's largest **IGBC PLATINUM-RATED Greenfield Smart City** is a significant and commendable achievement. This prestigious accolade, from the Indian Green Building Council (IGBC), underscores the meticulous efforts and dedication invested in integrating sustainable initiatives into the MET City project.

Launching three residential sectors, including the **MET Habitat Villa Project**, signifies not only interest but also substantial progress with numerous plots already sold and construction in full swing.

Having over **470 global companies** within the smart city infrastructure is a testament to the city's success and appeal. The diverse and substantial presence of these global companies underscores the city's ability to attract and foster businesses from around the world, highlighting its global competitiveness.

We have recently celebrated commencement of **construction for 100+ industrial units** as a major milestone. It represents the sustained growth of Reliance MET City and a tangible expansion of its industrial landscape. The initiation of construction for these units reflects the strong confidence and trust that businesses have in the MET City's capabilities and potential for fostering economic development.

The commitment to providing affordable healthcare services is a commendable initiative by Reliance MET City. The establishment of a **Reliance Aarogya Centre** at the site office campus reflects a dedication to the well-being of staff, construction workers, and community members. It facilitates both Online and Offline Consultations.

This year Reliance MET City has received various accolades for its achievements and set an example of continuous growth. Our commitment to sustainability has been acknowledged with the esteemed **"Most sustainable city in India"** Award presented by **FICCI**. This accolade highlights our concerted efforts in implementing eco-friendly practices, such as promoting green spaces, solar power utilization, 100% LED lights for streets and parks, NB-IoT based smart power and water systems, to reduce carbon footprints.

We also received esteemed awards such as the **"Most Trusted Brands of India"** in the Business City category in the 3rd Edition of Marksmen Daily , the **'Best Integrated Business City'** at the **NAREDCO Awards 2023** and **'India's Leading Brand 2023'** in Integrated Smart City by The Brand Story.

These awards are a testament to our commitment to excellence in creating a sustainable, innovative, and thriving business and living environment.

We vision to make Reliance MET City, India's fastest developing business destination.- Till date we have generated over **40,000 direct employment** and aiming for 1 lakh in coming years. These achievements collectively underline the positive impact and continuous growth trajectory of Reliance MET City. It sets a benchmark for sustainable and integrated urban development, contributing to the city's recognition and accolades on both national and global levels.

"Let's hope 2024 will be the year of Innovation and growth for everyone. Wishing you a very bright New Year."

From The Leader's Desk

Dear Readers,

Kon'nichiwa...

India and Japan are celebrating 70 years of diplomatic relations. In these 7 decades, both the countries have come closer both economically and in people to people connect. Today sources suggest that more than 11,000 Japanese live and work in India in more than 5000 Japanese entities while more than 40000 Indians consider Japan their home.

The enduring trade relationship between India and Japan has evolved into a robust strategic partnership, transcending economic boundaries to encompass diplomatic, security, and cultural cooperation. One of the key facet of this dynamic relationship includes the signing of the Comprehensive Economic Partnership Agreement (CEPA) in Feb 2020, aimed at bolstering trade and investment by minimizing or eliminating tariffs across a diverse spectrum of goods.

Bilateral trade volumes have demonstrated a positive trajectory, solidifying both nations as pivotal trading partners. Japanese investments in various sectors within India, spanning automotive, manufacturing, infrastructure, and technology sectors, have notably contributed to economic development of India. Japan is also India's largest partner in provide Overseas Development Assistance for multiple projects. Strategic initiatives such as the Mumbai-Ahmedabad High-Speed Rail (MAHSR) corridor, popularly known as the 'Bullet Train' project exemplify the collaborative nature of this relationship.

Joint endeavors, including participation in India's "Make in India" initiative and "Skill India" campaign, underscore a shared commitment to fostering collaboration in manufacturing and skill development. Despite the existing strong ties, there is a mutual acknowledgment of untapped potential for further growth in trade and investment, prompting ongoing exploration of avenues to enhance economic cooperation.

Reliance MET City, as the exclusive Japan Industrial Township in Haryana, has emerged as one of the preferred business hub for companies from Japan currently hosting six Japanese entities. These companies range from electronic manufacturing to medical device manufacturing to auto components. MET City's strategic location centers around multiple Japanese OEMs is a big draw for these companies to set up their operations and cater to wide spectrum of customers.

A recent visit by the members of Fukuoka Foreign Trade Association of Japan played an important role in nurturing dialogue and exploring business potential of MET City amongst companies from the prefecture. Furthermore MET City played host to senior delegation from the members of HIROSHIMA PREFECTURAL ASSEMBLY led by its Chairperson recently. Apart from these high level delegation visits, MET City played host to several high profile visits from Japanese businessmen through its wide relationship with JETRO, Invest India and other Japanese bodies. This engagements aligns very well with the broader objectives of economic development and expansion of cross-border business opportunities for MET City.

Renowned for its advanced technology and innovation, Japan's collaboration with India has seen greater trajectory focusing on key areas such as robotics, artificial intelligence, and renewable energy as relationship enters into a new era. Notably, Reliance MET City employs a state-of-the-art UF-based Water Treatment Plant, featuring best-in-class membranes sourced from ASAHI (Japan), exemplifying the success of such collaborative efforts.

In this corporate partnership landscape, both nations persistently seek avenues for sustained growth and mutually beneficial economic cooperation and MET City wants to play a perfect host to all such endeavours.

MET City Updates

MET City hosted a luncheon for HIROSHIMA PREFECTURAL ASSEMBLY MEMBERS

Reliance MET City hosted a luncheon for Hiroshima Prefectural Assembly Members, reinforcing its strong ties with Japan. Led by the assembly Chairperson and nine members, the event aims to foster increased economic partnership between Haryana and Hiroshima-based companies.

20 Members Delegation From Japan Visited Reliance MET CITY

MET City, recognized as a Japan Industrial Township, played host to a delegation from the Fukuoka Foreign Trade Association of Japan on November 23, 2023. This event marked a noteworthy development, illustrating the increasing interest of Japanese companies in India and their inclination towards investments in the region. The delegation, comprising 20 industry representatives from diverse segments, highlighted significant opportunities for collaboration.

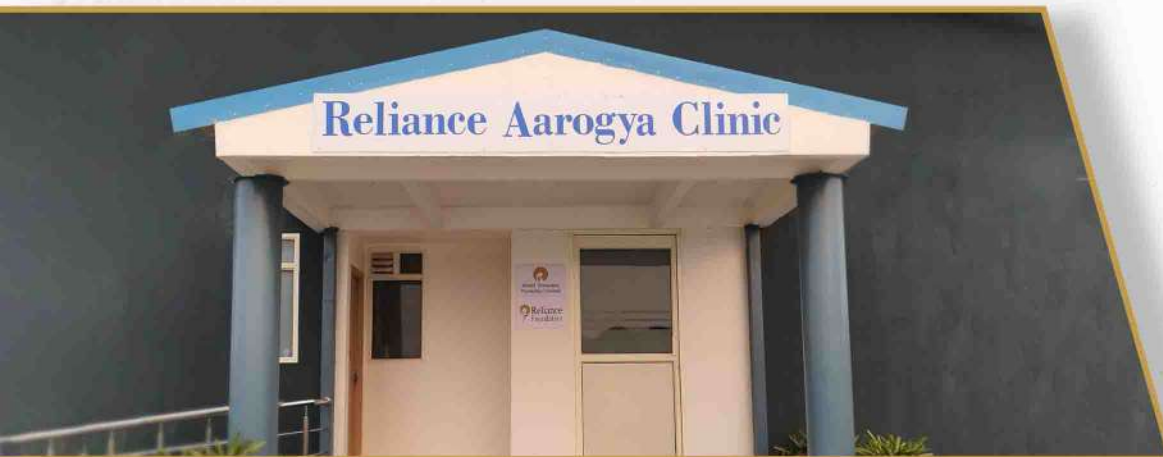

ESTABLISHMENT OF

Reliance Aarogya Clinic at MET City

We're delighted to announce the opening of Reliance Aarogya Clinic in MET City, offering comprehensive healthcare services for customers, employees, construction workers, and their families. The clinic provides Primary Health Care Services with immediate attention for minor illnesses and routine check-ups. Our healthcare professionals prioritize preventive care for the well-being of the industry workforce. Additionally, Online Consultation services enhance accessibility, allowing remote connections for timely advice and consultation.

Nihon Kohden

OPERATIONAL NOW

The commencement of operations at Nihon Kohden's largest manufacturing facility within Reliance MET City, Jhajjar, marks a significant milestone in the industrial landscape of MET City. This achievement not only bolsters production capabilities but also plays a pivotal role in fostering the growth of the healthcare sector in India.

MET-RF MISSION

Navodaya Program

In Jhajjar, the "Mission Navodaya" project, centered on Jawahar Navodaya Vidyalayas (JNVs), prioritizes quality education for underprivileged students. With a focus on personal development, 21 students from MET villages overcame financial barriers through free coaching. The program provides access to quality education, mentorship, and parental support, resulting in academic excellence. These students' success not only breaks the cycle of poverty but also exemplifies the transformative power of equal educational opportunities. Their achievements underscore the impact of initiatives like Mission Navodaya in fostering academic excellence and inspiring others from economically disadvantaged backgrounds.

METL INITIATIVE

Auro Scholarship

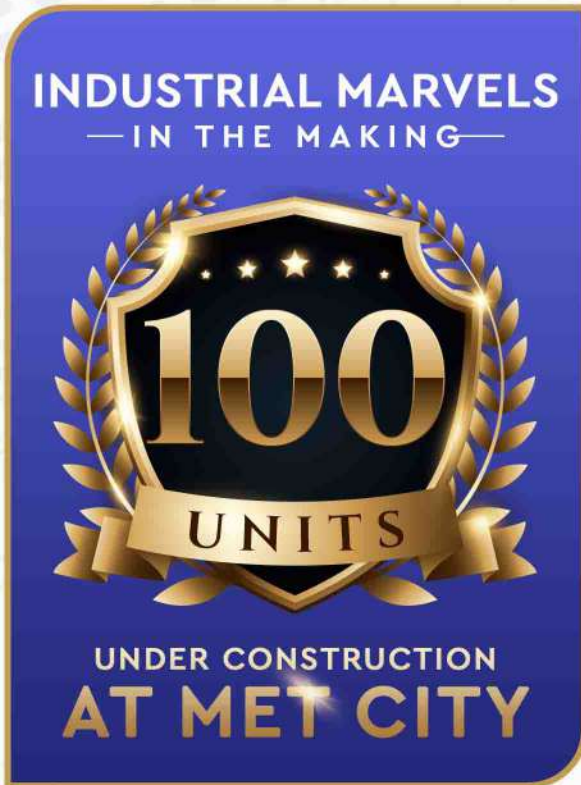

In collaboration with Sri Aurobindo Society, METL launched the AURO Scholarship Program to provide the world's first micro-scholarships for school students. Inaugurated by Sh. Rajesh Kumar Khanna, District Education Officer, Jhajjar, the program serves as a motivator for daily learning, enhancing teacher effectiveness and fostering accountability in a child's education. It covers the opportunity cost of keeping a child in school through micro-scholarships, ensuring quality education access for more families.

MET City Recap 2023

Celebrating the Journey to Smart City

Reliance MET City is a symbol of achievement, forging a path toward a more intelligent future, housing over 450

global companies operating seamlessly within its cutting-edge smart city infrastructure. With 100+ units under construction, we celebrated the commencement of our journey to create a smarter city for a brighter tomorrow.

Invest India features MET City

Reliance MET City hosted the 3rd edition of MET KONNECT, themed 'Smart Strategies, Sustainable Future.' The event was held in partnership with Invest India and IGBC. It offered a platform for exploring sustainability strategies in Green City initiatives, focusing on MSME growth and innovation. The major discussions covered sustainable urban solutions, waste management, green technology, financial initiatives, and government policies. The event included presentations, a Q&A session, and networking during a high tea session.

Panasonic

LIFE SOLUTIONS INDIA

A diversified technology company provides solutions to enrich people's lives at home and work and strives to build a greener future for our planet for over a century. It is a worldwide leader in the development of home appliances, industrial devices, automotive, lifestyle and connected solutions. Panasonic embarked on its India journey in 1972 and, ever since has established a significant presence contributing to the nation's technological advancement and economic growth. Today Panasonic India has more than 11+ manufacturing plants spread across India.

Panasonic's Techno park factory in MET City, Jhajjar, Haryana was established in 2012 to manufacture Air Conditioners, Washing Machines and Welding Machines. Today the Technopark factory plays a pivotal role in Panasonic's manufacturing ecosystem, producing a wide range of products including Air Conditioners, Washing Machines, Refrigerators, Smart Factory solutions, Welding Machines, Automotive Solutions to name a few. With an annual manufacturing capacity of approx. 10,00,000 ACs, 4,00,000 Washing Machines, 5,00,000 Refrigerators, 25,000 Welding machines to name a few, Techno park's integrated manufacturing capabilities enable end-to-end production processes, ensuring efficiency to meet local and foreign (export) demands. Recently, we introduced India's First Matter-Enabled Room Air Conditioners (RACs)* powered by Miraie. Techno park is strategically located in Reliance MET City, Jhajjar, Haryana showcasing the company's commitment to local manufacturing and contributing to the government's 'Make in India' initiative. The state-of-the-art facility is equipped with advanced technologies and adheres to global quality standards.

MET City | Company Profiling

Our Techno park factory is an extension of Panasonic's commitment aimed at innovation, quality, and sustainability. The company's values are deeply rooted in creating sustainable products and solutions that has minimal impact on environment. For instance, usage of Solar Power systems, employing energy efficiency practices such as air leakage rectification solutions, installation of auto cooling tower to regulate voltage supply, zero food wastage to name a few. Every initiative of ours is aligned with our larger mission to "minimizing the damage to the environment by our products and services and reduce the amount of energy we use in our production activities".

Mr. Manish Sharma said, "The rise of India's manufacturing sector underscores the country's geopolitical advantages, highly skilled workforce, and the push from the government to offer a stable business environment. We at Panasonic, have been contributing to India's \$5 trillion economy through our strategic efforts. Whether it is through our Techno park factory in MET City, Jhajjar or, the other plants in India, we have been committed to the 'Make in India' initiative to develop value-proposition solutions that helps make consumers life connected, comfortable, convenient while ensuring energy efficiency. Here, Reliance MET City has been instrumental in providing the right ecosystem to develop our world-class manufacturing hub for the world. Through our manufacturing efforts we look at backward integration and taking a holistic approach to champion smart and sustainable manufacturing and increasing our local production."

Mr. Manish Sharma
Chairman, Panasonic Life Solutions India & South Asia
